

# COMMITTED TO A *SUSTAINABLE* TOMORROW

**Truck-Lite's ISO 14001 Certified Sustainability plan is designed to minimize our environmental impact while enhancing the efficiency and safety of our products.**

-  **Eco-Friendly Manufacturing:** Since 2022, Truck-Lite had reduced over 40,000 lbs of plastic, metal, and lead in its products. As well as recycles a majority of its lighting & harness component scrap to a certified facility. Prioitizing sustainable materials and processes to reduce waste and energy consumption.
-  **Product Innovation:** Truck-Lite is transitioning away from incandescent to LED to offer advanced products not only for performance but also for longevity and energy efficiency, helping our customers reduce their environmental impact on the road.
-  **Community Engagement:** We are committed to fostering a culture of sustainability within our communities. Through partnerships and outreach programs. Like the Erie beach cleanup and recycling throughout its facilities.
-  **Transparency and Accountability:** Truck-Lites's Significant Aspect Reduction Team is responsible for regularly tracking and reporting progress, ensuring that its sustainability initiatives are effective and aligned with industry best practices.

**Sustainability isn't just a goal; it's a journey. Together, we are driving toward a brighter, more sustainable future for everyone.**
